## Wastewater Lift Station #8 – Rehabilitation Project

### Scope of Work

The Wastewater Lift Station # 8 Rehabilitation Project consists of completing rehabilitation of sewer lift station #8, which is located behind City Hall and the Police Station at the intersection of Old Federal Highway, SE 5th St. and SE 4th Avenue. The majority of the work will be completed inside of the lift stations structure. A portable bypass pumping system will be set up at the lift station but within the perimeter fence. The pump will start automatically as needed 24/7 until the repairs are completed.
