### Background

One of the critical issues that the City of Hallandale Beach faces is flooding. To minimize the flooding nuisance within the project limits listed below, the City will be constructing a Drainage Improvement Project. In addition, it will include pavement restoration and markings, re-grading and sodding of swales as necessary, sidewalk replacement, and new ADA compliant ramps.

### Scope of Work

The improvements under this contract consist of site and civil work associated with the construction of new drainage structures and french drains. Once the new drainage structures are installed the City will mill and resurface portions of the roadway within the project limits. All work under this contract is within the City's right-of-way. The project improvement will be at the following locations:

- Along NW 2nd Avenue (between NW 7th Street and NW 9th Street)
- Along NW 7th Court (between NW 2nd Avenue and NW 3rd Avenue)
- Along NW 8th Street (between NW 2nd Terrace and NW 2nd Avenue)

### Project Limits/Proposed Locations
